

2 HOUR BATH DESIGN PACKAGE

*All Successful Remodeling Projects
Start with a Great Design!*

Read the client reviews on the side bar. They all started out talking to other companies that offered free design and estimates before they found me and bought this Design Package. They did not get the answers (knowledge) they needed from the freebies. The greatest fear we all have when making any large investment, is of making a mistake and wasting or losing our money. Knowledge dissolves fear and turns it into confidence. This Design Package is your crash course to moving forward with confidence and understanding. A small price to pay to protect your big investment.

First and foremost, you will learn how to make your bathroom function and look better, no matter how big or small. Second, you will learn the pros and cons of all the material options you will face. We will give you the real pros and cons we have learned over our 4 decades in business, not the sales pitch of manufactures or showroom personnel.

**Winner of over 20 National Design Awards
Numerous Projects Published Nationally**

CSLB licensed: B-1, C-6, & C-54 #500310

Get the answers you need.

Call us today, you will be glad you did!

CLIENTS SAY IT BEST!

“He was amazing. His insights were so clear and obvious after he discussed them with us, but made a huge impact on how we designed our kitchen as no one else had made these comments/had these ideas.”

- Ryan Eddingfield

“Everyone else we have spoken to has tried to sell us something, or talk us into something without regard for what is best for us. They have either been salesmen with limited nuts and bolts construction knowledge, or construction people with little design experience who want us to talk to an architect. Your knowledge of the process from start to finish was very welcome.”

- Charles Weiss

“Without exception, we highly recommend Dan Nesovic. His knowledge and experience in design and construction and his patience in guiding us through this remodel were outstanding.”

*- Charles & Pam
McPherron*

By Appointment Only

Serving San Diego
Since 1977

Most clients are amazed at how much we get done in this two-hour consultation. If you can prepare for the consultation with the steps I outline below, it will maximize the effectiveness of our time together.

WHAT YOU GET:

- You will get an education few others can offer and will know what you want to do and why by the time we are done.
- If your bathroom project is simple or small in nature, I will send you a dimensioned floor plan a few days after our meeting.
- This floor plan with your material choices, can be used by any professional to more accurately estimate your project.
- You will move forward with clarity and confidence.
- *If your project is larger or more complicated, requiring a complete spacial study of the area with multiple plans to consider, you will be given the option to upgrade to a 5-hour package.*

YOUR TO-DO LIST TO PREPARE FOR OUR MEETING:

1. **Tell me how long you plan to live in the home.** *In today's economy, when clients tell me they are only planning to live in a house for 5 years' maximum, I tell them to just paint or do something very small! Why? The economy is not what it was prior to 2008. Back then, a kitchen or bath remodel would make you a profit if you sold your home the day we finished work. Today, I can safely say, you will not get your money back on a major remodel of your kitchen or bath, in the short term, due to changes in the appraisal process.*
2. **Make a prioritized list of all you want to accomplish with the remodel.** *I need to know what is most important down to the least important. Remodeling is often a process of designing to get the most out of the inherent limitations all existing homes have, while staying within your budget. Include questions you have that you could not find answers for on [my web site](#). You will find answers to many of your questions there.*
3. **Tell me your budget!** *Most people are afraid to do this because they think buying a remodel project is a game and in divulging their budget they may lose the game. A good designer will design to your budget and give you material options or alternate plans to keep the project affordable to you. Designing with no budget in mind, most often leads to great disappointment and a lot of wasted time and money.*
4. **Put together an idea book of cabinets, counters, plumbing fixtures, and bath pictures that you really like for any reason.** *It will give me an insight into how to create a space that will capture the feelings those pictures induce. The photos can and often are very different. That is OK. I will try to understand and educate you, what the common elements may be that please you. [Houzz.com](#) is a great resource to do this. You can create an idea book in Houzz for your project then send me a link to it in an email.*

My [web site](#) is an educational site, not a marketing site. It has answers to many of the most often asked questions about counter tops, cabinets, and remodeling. Take some time and read through the sites main pages and blog before our meeting, and email me the information outlined above so I can prepare and our meeting is as productive as possible.
